

SEARS Launch Report

December 10th 2005
Samson, AL

- The weather was tolerable with temps between 45 and 55 degrees. Winds were variable in direction but less than 7mph at the surface.

- There were 21 fliers and 135 flights

- Twenty four of the flights were the Art Applewhite 13mm designs. Happily, all twenty four ignited and left the pad. The prizes donated by Art Applewhite were distributed to randomly selected participants.

- Zach Cleland brought an Estes Oracle Camera Rocket that made some excellent on-board video

- We had the Samson TARC team attending. They donated a Team T Shirt to the club which the club president wore during the launch.

- Jordon Britt of Pensacola attended his first launch with us. He displayed his Rochella Space Agency fleet. Including a very detailed launch tower.

**Chris Crews' Innovative 24mm
Fishing Pole Rocket**

- A search party was formed at the end of the launch to find Zach Cleland's Loc Vulcanite including John Hansel and Kendall Brent, Chris Short and Chris Crews. The rocket was located in a tree and Chris Crews saved the day by getting a shotgun and shooting the rocket out of the branches. A number of us gathered at Crews BBQ at Samson at the end of the launch.

Intense activity at pad

- Thanks to Keith Stewart for distributing the New Logo T Shirts during the launch. And as always thanks to Randy Wiggins for handling the launch gear. Randy makes some repair or improvement in the gear each month.
